DOE Selects Small Business Contractors For Future Cleanup Work

Cincinnati – As part of Energy Secretary Steven Chu's goal to support small businesses across the country, the Department of Energy (DOE) selected 12 companies to receive Office of Environmental Management (EM) Nationwide Multiple-Award Small Business Set-Aside Indefinite Delivery/Indefinite Quantity (ID/IQ) contracts. Selected companies that are eligible for contract awards will be able to compete for future work that will be performed at various DOE sites.

The total value of the cleanup projects can reach up to \$926 million over five years. The services under the Nationwide ID/IQ contracts include: environmental remediation; deactivation, decommissioning, demolition and removal of contaminated facilities; waste management; and regulatory compliance. Since these companies are prequalified, the ID/IQ contracts will provide DOE site managers with a flexible contracting vehicle for a variety of cleanup requirements and reduce the acquisition process time.

The following companies have been selected under the EM Nationwide Small Business Set-Aside ID/IQ contract competition:

- Clauss Construction, Lakeside, Calif.
- Dynamic Management Solutions, LLC, Kennewick, Wash.
- Gonzales-Stoller Remediation Services, LLC, Broomfield, Colo.
- Innovative Technical Solutions, Inc, Walnut Creek, Calif.
- LATA-Sharp Remediation Services, LLC, Westerville, Ohio
- Navarro Research and Engineering, Inc., Oak Ridge, Tenn.
- North Wind, Inc., Idaho Falls, Idaho
- Philotechnics Dade Moeller, LLC, Oak Ridge, Tenn.
- Portage, Inc., Idaho Falls, Idaho
- Professional Project Services, Inc., Oak Ridge, Tenn.
- Safety and Ecology Corporation, Knoxville, Tenn.
- Terranear PMC-Energy Solutions Environmental Services, LLC, Exton, Pa.

EM is responsible for the largest nuclear environmental cleanup project in the world. After five decades of nuclear weapons production, the legacy of the Cold War has left 1.5 million cubic meters of solid waste and 88 million gallons of liquid waste to be dispositioned.

Additional information on the ID/IQ acquisition can be found at:
